Established Global Trust

Jodoo has been trusted by over 20,000 customers, delivering tailored solutions across a wide range of industries.

Comparing app development methods

Independent Software Development

More Barrier
Coding takes up 80% of the app development.

Low Agility
Hard to support loads of customized demands.

Challenging to Maintain
Independent development requires complex code maintenance.

VS

No-Code Platform
Jodoo

🤩 No Barrier
The drag-and-drop experience enables everyone to build an app with components.

🏈 High Agility
Customize apps according to demands. A swift iteration takes only a few hours.

🍰 Easy to Maintain
Non-IT personnel can maintain the system easily, and the SaaS platform upgrades automatically every two weeks.

VS

Standard Product

Hard to Introduce
Products of great complicity and poor usability are often abandoned.

Costly Customization
High cost for the customization project and secondary development.

Moderately Maintainable
Updates to standard products may require additional costs.

Comparison with Similar Products

How Jodoo is different from others.

JODOO

Low-Code Tools

Different Positioning

Jodoo focuses on increasing efficiency for business personnel, with a flat learning curve and great usability.

Compare with: OutSystem, Mendix, Zoho Creator, Power Apps, Appian, etc.

No-Code Tools

We are All-in-One

Jodoo is an all-in-one platform that supports more powerful BPM, dashboard, and unlimited app development, with open API and webhook supported.

Compare with: Airtable, Odoo, Zapier, Webflow, etc.

Workplace

Automated and Smarter Workflow

Jodoo specializes in customizing business apps to meet changing needs, offering better workflow automation and advanced data handling tools.

Compare with: Microsoft 365, Notion, Google Workspace, etc.

ERP/Financial Systems

Fully Customizable

Workflow and field customization on Jodoo are flexible. Apps on Jodoo can also be integrated with your core systems through APIs or other ETL tools.

Compare with: AutoCount, SQL Accounting, SAP, etc.

Security

JODOO

Record-Level Access Control
Control who can view, edit, or build within your apps, ensuring only the right people have the right access.

Two-Factor Authentication (2FA)
Add an extra layer of security to your account with 2FA, so only verified users can log in.

Password-Protected Links
Lock down your forms behind a password, ensuring only authorized users can open and submit them.

Single Sign-On (SSO)
Integrate SSO (available on Enterprise plan) for easy, secure login using your existing identity provider.

RBAC For All Plans
Create custom roles for specific business needs, ensuring every user has just the right level of access.

Detailed Audit Logs
Track who logs in, what changes they make, and when they make them. Get a clear picture of all account activity.

Private by Default
All new content starts out private. Change settings anytime to share apps, forms, or dashboards with team or the public.

Custom Collaborator Roles
Define what guests can do in your workspace, from simple viewing to full editing rights.

JODOO Use Case in Enterprise

01 Agile business scenario

For newly developed businesses by enterprises that require rapid verification or have not yet solidified processes, with a high degree of customization, they need to be launched quickly and updated and iterated rapidly

02 Long-tail demand

- Fragmented and highly customized demands on the business
- Scenarios that industry standard software products fail to meet
- IT does not have the energy to cover all non-core scenarios

03 Integration

The enterprise has built a variety of business applications and needs to integrate various systems to achieve the integration of business processes and data and solve the problem of data isolation

04 Mobile Scenario

Mobile terminal data entry, process application approval, data viewing and other office scenarios frequently used by front-line employees, business travelers, etc

Typical Business Requirement
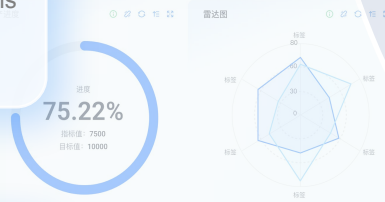

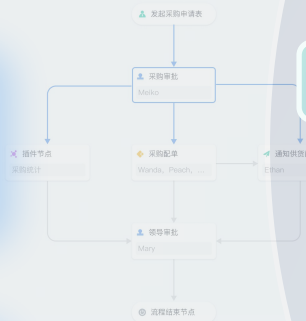

Paperless office

- Records of item collection and return, visitor registration, reporting and archiving of inspection data, etc

Closed -loop management

- Feedback, task flow, PDCA cycle improvement, etc

Notification and Collaboration

- Real-time notification and reminder of tasks, collaborative processing, information sharing, etc

Visualized analysis

- Data integration + dashboard, lightweight, practical and personalized reports

Business verification

- Digitization implementation tools for exploratory business, prototype tools for information system development, etc

LCD Controller Board Company

A demo tool to boost innovation and improve solutions.

Demo tool: The development team can demonstrate the concept to help team members understand.

Innovation: Encourage the team members to participate in the app development.

Customer Solutions: After successful internal experiences, they began to deliver solutions to their customers with Jodoo.

Plastic Manufacturing Company

A sales system completely built by salespersons, not ITs.

Order Management: Sales and technical team reviewed orders and handed them to the financial team for gross profit margin calculation.

Production Management: In the app, employees make production plans by analyzing orders and assigning equipment.

Salary Management: Once production is complete, the system calculates employee wages based on product unit price.
